Mockito Cheat Sheet

Mock Creation

```java
public class User {

    User(int age) {}

    boolean isAdult() { //... }

    boolean isFriendWith(User user) { //... }

    void setName(String name) { //... }

}

User mockedUser = mock(User.class);
```

Verifications

```java
verify(mockedUser).setName("Thomas");

verify(mockedUser).setName(anyString());

verify(mockedUser).isAdult();
```

Setting Default Actions

```java
when(mockedUser.isFriendWith(any())).thenReturn(true);

when(mockedUser.isAdult()).thenReturn(false);
```
